Unsteered machine–human gap vs token norm over depth · l8b · drlXpaired_wiki_gpt_4o_256_tokens (test texts, n = 90; band = 95% CI)
A Token norm grows
mean token norm $\bar{u}_l$
layer l
B Position along the class direction $\hat{r}_l$
mean $\hat{r}_l \cdot h$
Machine
Human
Gap (machine − human)
layer l
C Same, as % of the token norm
$\hat{r}_l \cdot h \,/\, \bar{u}_l$ (%)
layer l
D Along $\hat{r}_8$: push at L8, c = 0.05
mean $\hat{r}_8 \cdot h$
Machine, unsteered
Machine, pushed at L8
Human, unsteered
Human, pushed at L8
layer
